

**23** What is the correct description of the bonding between the two carbon atoms in ethene?

- A** a  $\sigma$  bond and a  $\pi$  bond that are longer than a C–C single bond
- B** a  $\sigma$  bond and a  $\pi$  bond that are shorter than a C–C single bond
- C** two  $\pi$  bonds that are longer than a C–C single bond
- D** two  $\pi$  bonds that are shorter than a C–C single bond
