

10 The reaction between NO and Br₂ is proposed to proceed via the following mechanism:

Which statements are correct?

- 1 NOBr₂ is a radical.
- 2 The rate equation for this reaction is $\text{rate} = k[\text{Br}_2][\text{NO}]^2$.
- 3 NOBr₂ is formed at the transition state.

- A** 1, 2 and 3
B 1 and 2 only
C 2 and 3 only
D 1 only
