

- 12 Which of the following statements is true about the following energy profile for a catalysed reaction shown below?

- 1 The reaction is catalysed by a heterogeneous catalyst.
- 2 The enthalpy change of the reaction is $E_3 - E_2$.
- 3 **F** is the intermediate formed.
- 4 The second step of the reaction is the rate determining step.

A 2 and 3 **B** 2 and 4 **C** 1 only **D** 4 only
