

14 Consider the following reaction:

The proposed mechanism for the reaction involves the following steps:

Based on the given information, what is the rate equation for the reaction?

- A rate = $k[\text{P}]^2[\text{Q}]$
- B rate = $k[\text{P}_2][\text{Q}]$
- C rate = $k[\text{P}]^2$
- D rate = $k[\text{P}]^3[\text{Q}]$
