

3 The molecules CO_2 , CS_2 and COS have the same shape.

Which statements are correct?

- 1 The molecules all contain polar covalent bonds.
- 2 The molecules each contain two sigma and two pi bonds.
- 3 Only COS has permanent dipole–permanent dipole interactions.
- 4 COS has stronger instantaneous dipole–induced dipole interactions than CS_2 .

A 1, 2 and 3 only

B 2 and 4 only

C 2 and 3 only

D 1 and 4 only
