

8 **K**, **L** and **M** are elements with atomic numbers between 11 and 18. They have the following properties compared to other elements in Period 3.

- **K** has the largest ionic radii.
- **L** has the highest melting point.
- **M** has the second highest electrical conductivity at room temperature.

Arrange the elements in order of increasing atomic number.

A **K, L, M**

B **L, M, K**

C **K, M, L**

D **M, L, K**
