

- 17 The graph shows the changes in pH when excess 0.10 mol dm^{-3} base solution is added gradually to $y \text{ cm}^3$ of 0.10 mol dm^{-3} acid solution.

Which combination could have given these results?

	acid	base	y / cm^3
A	H_2SO_4	NH_3	10
B	H_2SO_4	NH_3	5
C	$(\text{COOH})_2$	KOH	10
D	$(\text{COOH})_2$	KOH	5
