

18 Given the following solubility product, K_{sp} , which of the following statements is correct?

salt	K_{sp}
Ag_2SO_4	1.4×10^{-5}
PbSO_4	1.6×10^{-8}
PbI_2	7.1×10^{-9}

- A** All three K_{sp} values have the same unit.
- B** PbSO_4 has a lower solubility in pure water than PbI_2 .
- C** Solubility product of Ag_2SO_4 decreases when added to sulfuric acid.
- D** When solid Na_2SO_4 is added to a solution containing 0.01 mol dm^{-3} of $\text{Ag}^+(\text{aq})$ and $\text{Pb}^{2+}(\text{aq})$, Ag_2SO_4 precipitates before PbSO_4 .
