

- 26** How many moles of $\text{H}_2(\text{g})$ is produced when 1 mole of **Q** reacts with $\text{Na}(\text{s})$ and how many moles of $\text{CO}_2(\text{g})$ is produced when 1 mole of **Q** reacts with $\text{Na}_2\text{CO}_3(\text{aq})$?

Q

	$\text{H}_2(\text{g})$ produced with $\text{Na}(\text{s})$	$\text{CO}_2(\text{g})$ produced with $\text{Na}_2\text{CO}_3(\text{aq})$
A	0	1
B	1	2
C	1	0
D	2	1
