

17 In this question, assume only As and Zn change oxidation numbers.

Arsenic trioxide, As_2O_3 , reacts with zinc in the presence of sulfuric acid. Zn is oxidised to Zn^{2+} and 6 moles of Zn react with 1 mole of As_2O_3 .

What is the oxidation number of As in the arsenic containing product of this reaction?

A -3

B 0

C +1

D +2
