

- 3 The diagram shows the first seven ionisation energies for aluminium, silicon and phosphorus.

Which conclusions could be supported by the data illustrated?

	shielding increases as electrons are removed	inner shell electrons are held more strongly than those in outer shells
A	✓	✓
B	✓	✗
C	✗	✓
D	✗	✗

✓ = can be supported

by the data illustrated

✗ = cannot be supported

by the data illustrated
