

26 Nanoparticles have many important commercial applications.

The table shows the particle size for a number of materials, where the diameter in nm, is taken as a measure of particle size. Assume the particles are spherical.

	particles	diameter /nm
1	water molecule	0.3
2	buckminsterfullerene molecule	1.0
3	cold virus	30
4	platinum granules in a catalytic converter	250

Which particles are classified as nanoparticles?

A 1 and 2

B 2, 3 and 4

C 2 and 3 only

D 3 and 4 only
