

10 Hydrogen can be made from steam.

The Gibbs free energy change of reaction at two different temperatures are shown.

At 378 K, $\Delta G_1 = +78 \text{ kJ mol}^{-1}$

At 1300 K, $\Delta G_2 = -58 \text{ kJ mol}^{-1}$

Which row gives the correct signs of ΔH and ΔS for this reaction?

	ΔH	ΔS
A	—	+
B	—	—
C	+	—
D	+	+
