

13 The mechanism below has been proposed for the reaction of CHCl_3 with Cl_2 .

Which of the following rate equations is consistent with this mechanism?

- A** rate = $k[\text{CHCl}_3][\text{Cl}]$
- B** rate = $k[\text{CHCl}_3][\text{Cl}_2]$
- C** rate = $k[\text{CHCl}_3][\text{Cl}_2]^{1/2}$
- D** rate = $\frac{k[\text{CHCl}_3]}{[\text{Cl}_2]}$
