

11 The concentration of carbon dioxide in the blood is regulated by the following equilibria.

Which statements about these equilibria are correct when the pH of the blood decreases?

- 1 Both equilibria move to the left-hand side.
- 2 HCO_3^- acts as a Brønsted-Lowry acid.
- 3 The $[\text{HCO}_3^-]$ increases.

A 1 and 2

B 2 and 3

C 1 only

D 3 only
