

- 14 Element X is a Period 3 element. It has a chloride that dissolves in water to form a solution with a pH of 7 and an oxide that reacts with water to form a solution with a pH of 14.

What other property will element X have?

- A It does not conduct electricity.
- B It exists as diatomic molecules with formula X_2 .
- C It is a reducing agent.
- D Its oxide has a simple molecular structure.
