

- 20 The rate of the reaction between hydrogen and nitrogen monoxide can be monitored by measuring how their concentrations change with time.

The rate equation is shown.

$$\text{rate} = k[\text{H}_2][\text{NO}]^2$$

What are the units of the rate constant, k ?

A $\text{mol dm}^{-3} \text{s}^{-1}$

B $\text{mol}^2 \text{dm}^{-6} \text{s}^{-1}$

C $\text{mol}^{-2} \text{dm}^6 \text{s}^{-1}$

D $\text{mol}^{-2} \text{dm}^{-6} \text{s}^{-1}$

- 21 Nitrogen dioxide, NO_2 , is a pollutant. It is produced when nitrogen monoxide, NO , is oxidised
