

25 Which pair of statements is correct for any reversible reaction that is at dynamic equilibrium?

	rate of reaction	concentration of species
A	the forward and reverse reactions have equal rates	the concentrations of the reactants and products are constant
B	the forward and reverse reactions have equal rates	the concentrations of the reactants and products are equal
C	the forward and reverse reactions stop	the concentrations of the reactants and products are constant
D	the forward and reverse reactions stop	the concentrations of the reactants and products are equal
