

29 The skeletal formula of X is shown.

X

X can be made by reacting compounds Y and Z in the presence of dichlorohexylcarbodiimide, DCC.

What are the identities of Y and Z?

	Y	Z
A	2-methylbutanoic acid	butylamine
B	2-methylbutanoic acid	propylamine
C	3-methylbutanoic acid	butylamine
D	3-methylbutanoic acid	propylamine
