

- 17** Which statement about phosphoric(V) acid, H_3PO_4 , ($\text{p}K_{\text{a}} = 2.0$) is **incorrect**?
- A** PO_4^{3-} can react as a base.
 - B** H_3PO_4 has a higher K_{a} than HPO_4^{2-} .
 - C** A buffer of pH 2.0 can be prepared using equal amount of H_3PO_4 and HPO_4^{2-} .
 - D** HPO_4^{2-} has a higher K_{b} value than H_2PO_4^- .
