

- 11 The graph shows how the initial rate of reaction varies for an enzyme catalysed reaction as the substrate concentration changes.

Which of the statements correctly describe the situation when $[\text{substrate}] = x$?

- 1 The initial rate of reaction is affected by increasing $[\text{substrate}]$.
 - 2 The order of reaction with respect to $[\text{substrate}]$ is 1.
 - 3 There are no more enzyme active sites available.
- A** 1, 2 and 3
B 1 and 2 only
C 2 and 3 only
D 3 only
