

- 21 Equal amounts of compounds X, Y and Z were heated with ethanolic silver nitrate in three separate test-tubes. After some time, the precipitate formed in each test-tube, if any, was filtered, dried and weighed.

Compound X produced the largest mass of precipitate in the shortest time, while compound Z did not produce any precipitate.

Which of the following could be the identities of X, Y and Z?

	X	Y	Z
A			
B			
C			
D
