

23 Two female sex hormones are oestrone and oestradiol.

oestrone

oestradiol

Which of the following reagents could be used to distinguish between the two hormones?

- 1 | Acidified aqueous $\text{K}_2\text{Cr}_2\text{O}_7$
- 2 | Acidified aqueous KMnO_4
- 3 | Aqueous alkaline iodine

- A** 1, 2 and 3
B 1 and 2
C 2 and 3
D 1 only

Commented [SXF(7)]: I don't think it is in the syllabus that the need to know SOCl_2 . Change to PCl_5
