

**30** A reaction scheme involving  $\text{Cr}^{3+}(\text{aq})$  ions is shown.

Which statement about the reaction scheme is correct?

- A** Reactions **I** and **II** are redox reactions.
- B** The observations of reaction **II** are a grey-green precipitate and effervescence.
- C** Reagent **R** could be zinc metal.
- D** The  $\Delta S$  for reaction **IV** is negative.
