

17 Four data values are available.

- the standard enthalpy change of formation of methanol
- the standard enthalpy change of formation of carbon monoxide
- the standard enthalpy change of combustion of ethanol
- the standard enthalpy change of combustion of carbon monoxide

Which other enthalpy change can be calculated using some or all of these data values?

- A** the standard enthalpy change of combustion of carbon
- B** the standard enthalpy change of combustion of methanol
- C** the standard enthalpy change of formation of methyl ethanoate
- D** the standard enthalpy change of formation of water
