

- 29** Information about the structure of a polymer may allow us to predict something about its physical properties.

Which predictions are likely to be accurate?

	information about structure	prediction about property of polymer
1	increase in branching about the chain	increase in density
2	increase in hydrogen bonding between chains	increase in strength
3	increase in cross-linking between chains	decrease in flexibility

- A** 1, 2 and 3 **B** 1 and 2 only **C** 1 only **D** 2 and 3 only
