

8 Physical properties of three substances, W, X, and Y, are shown.

|   | melting point / °C | boiling point / °C | electrical conductivity |        |                  |
|---|--------------------|--------------------|-------------------------|--------|------------------|
|   |                    |                    | solid                   | liquid | aqueous solution |
| W | 993                | 1695               | poor                    | good   | good             |
| X | -130               | 36                 | poor                    | poor   | insoluble        |
| Y | 1610               | 2230               | poor                    | poor   | insoluble        |

In which row do the chemicals match the physical properties?
