

	break one mole of bonds	nuclei of the two bonded atoms
B	the energy needed to break one mole of bonds	the distance between the outer shells of the two bonded atoms
C	the energy needed to make one mole of bonds	the distance between the nuclei of the two bonded atoms
D	the energy needed to make one mole of bonds	the distance between the outer shells of the two bonded atoms

9 Which pair contains an Arrhenius acid and an Arrhenius base?

A $\text{H}_2\text{SO}_4(\text{aq})$, $\text{NH}_3(\text{g})$
