

27 Which statements about the electrochemical cell below are correct?

- 1 The e.m.f of the cell is +0.03 V.
 - 2 Addition of water to the Fe^{3+} / Fe^{2+} half-cell increases the e.m.f of the cell.
 - 3 Increasing the mass of the Ag electrode does not affect the e.m.f of the cell.
 - 4 Addition of excess NaOH(aq) to the Fe^{3+} / Fe^{2+} half-cell increases the e.m.f of the cell.
- A** 1, 2 and 4 only
- B** 1, 3 and 4 only
- C** 3 and 4 only
- D** 3 only
