

18 Which ionic compound has the lattice energy with the greatest magnitude?

- A** a compound formed from an element at the top of Group 1 and an element at the bottom of Group 17
- B** a compound formed from an element at the top of Group 1 and an element at the top of Group 17
- C** a compound formed from an element at the top of Group 2 and an element at the bottom of Group 16
- D** a compound formed from an element at the top of Group 2 and an element at the top of Group 16
